

## Community partnership leads to new place to nourish body and soul

Just adjacent to South Pointe Hospital is a new place to gather, reflect, and nourish the body and soul. It's the Eastwood Wellness and Fitness Park.

The planning started over a year ago when a development committee formed to design an area for the Warrenton Heights community and those who call South Pointe home—caregivers, medical residents, and students, to gather and promote health and wellness.

Just adjacent to South Pointe Hospital is a new place to gather, reflect, and nourish the body and soul. It's the Eastwood Wellness and Fitness Park.

The planning started over a year ago when a development committee formed to design an area for the Warrenville Heights community and those who call South Pointe home—caregivers, medical residents, and students, to gather and promote health and wellness.

A unique public and private partnership that included Cleveland Clinic, South Pointe Hospital, the City of Warrenville Hts., Cuyahoga County Office of Development, and The Brentwood Foundation led to a \$230,000 investment into the community.

Eastwood Wellness and Fitness Park is equipped with upper and lower body outdoor fitness equipment, and there are checker and chess game tables around a paved walking path. Safe lighting, beautiful landscaping with pollinating perennials, and shading trees abound in the park. Recently, protected by masks and social distancing, a small group of Cleveland Clinic caregivers and public officials attended a ceremony to celebrate this achievement.

At the event, ONE HR's own [Matt Reifsnnyder](#), administrative program coordinator, Employee Wellness, presented the 2020 Wellbeing Award. The honor went to Anne Spadaro, wellness coordinator at South Pointe Hospital, who was honored for her outstanding contributions in organizing programs to benefit her fellow caregivers and community members.

You are welcome to visit the new park where you will find a labyrinth amongst the flowers. Park hours are 8 a.m. – 8 p.m.
